EXPERIENCE

Family Tree DNA

Subsidiary of Gene by Gene

Position: QA Tester

September 2014-Present

Houston, TX

November 2017 - Present

- Lead QA tester on 9 major projects in the last 32 months
- Led stand ups and reported project's progress to project management for much of the development process of two major projects
- Wrote several test cases for manual and automation tests
- Wrote 6 automated tests in C# within a .Net framework using Selenium WebDriver
- Used Postman to test API endpoints that were used by 3rd party clients
- Frequently used SSMS and SQL queries to identify prime examples for test cases I developed
- Worked closely with developers to problem solve issues arising in projects and smaller tasks alike
- Participated in several meetings to help Product Owners size backlogged tickets and investigate tickets further when necessary

EDUCATION

Full-Stack Web Development Certification | University of Texas at Austin (June 2020 – December 2020)
